DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 23 are allowed.

Independent claim 1 recites a picture coding system comprising "...a quantization step controller modifying a quantization step in compression processing of said encoder based on the information from said input buffer monitor and said output buffer monitor, wherein said modification of said quantization step is based on an input buffer storage volume measured at the input buffer..." which is a feature that is not anticipated by the art of record. Dependent claim 23 is allowed for the reasons concerning the independent claim. Withdrawn claims 2-22 need to be canceled in order for the application to be placed in a condition for allowance.
